

Module 1 Quiz

22 questions

1
point

1.

If I miss an assignment deadline or fail an assignment, I fail the course.

☒ True

☐ False

1
point

2.

This is a completely self-paced course. The deadlines don't matter at all!

☒ True

☐ False

1
point

3.

I can go through the course faster and complete it faster!

☐ True

☒ False

1
point

4.

In order to install Browser Sync, what must be installed first?

- ☐ Java
 - ☐ Ruby
 - ☐ Google Chrome Developer Tools
 - ☐ Javascript
 - ☐ Nodejs
-

1
point

5.

The **core** purpose of HTML is to

(hint: something a pure text file with content won't be able to accomplish)

- ☐ Tell the browser how to position and align content in the browser window
 - ☐ Display web page content to the user
 - ☐ Tell the browser what should happen once the page is loaded
 - ☐ Communicate the structure of the content
-

1
point

6.

W3C (World Wide Web Consortium) is the only organization that dictates what and how browsers should implement HTML5

- ☐ True

☐ False

1
point

7.

ALL HTML5 tags must

- ☐ Have at least 1 attribute
- ☐ Have an 'id' attribute
- ☐ Have a closing tag
- ☐ Have an opening tag
- ☐ Be lower case, i.e.,

`<p>`

not

`<P>`

1
point

8.

Identify correct HTML5 page declaration(s)

- ☐ `<!doctype html>`
- ☐ `<!DocTyPe htML >`
- ☐ `<html-document>`
- ☐ `<! doctype html>`

☐

```
<!doctype html5>
```

☐

```
<!DOCTYPE html>
```

1
point

9.

What would happen if you didn't specify the HTML5 declaration?

- ☐ The page will not display at all
- ☐ How should I know? I didn't really watch the videos!
- ☐ Nothing. HTML5 is very liberal about its declaration and it's only a recommendation to use it
- ☐ The page will be interpreted in quirks mode
- ☐ The browser will revert to the previous version of HTML automatically

1
point

10.

Browsers ALWAYS interpret HTML sequentially, top to bottom

- ☐ True
- ☐ False

1
point

11.

Identify invalid HTML code snippet below (assume code around it, i.e., declaration, etc. is valid)

```
<article>
<h2>Wow!
</h2>
<p>You're ignoring all the other answers just to
look at me?! I AM special!
...
Wait! Where are you going?
What if I AM the answer you've been searching fo
r???!
</p>
</article>
```

```
<div>Hey there!

I am just a lonely quiz answer. Will you click m
e? I am bored!

</div>
```

```
<div><span>Will you just tag along with me?</spa
n></div>
```

```
<section>
<p>The sale numbers are in...
</section> You ARE a closer, Johnson!
</p>
```

point

12.

Meta tags communicate information about the browser to the server

True

False

point

13.

Without applying any additional styles, the following code snippet will show up in the browser as how many lines of text? (Assume the browser is stretched wide enough not to cause any single line to wrap)

```
<div>Dear all,  
<span>I took this really cool course  
</span></div>  
<span>on Coursera.org. I think it's  
my favorite course I've EVER taken!  
Here is the URL for it:  
</span>  
<a href="...">HTML, CSS and JS for Web Developers</a>  
<div>  
Does anyone know how I can give this course 6  
out of 5 stars?  
</div>  
<div>  
Thank you,  
-Yaakov.... I mean a random student! Definitely not Yaakov.  
</div>
```

- ☒ 1
- ☒ 2
- ☐ 4
- ☒ 3
- ☒ 10
- ☒ 7
- ☒ 9

point

14.

Identify invalid HTML code snippet (assume code above and below this code is valid)

☐

```
<a>I love <div>gardening<span>!</span></div></a>
```

☐

```
<span>I love <div>gardening</div></span>
```

☐

All are valid!

☐

```
<div>I love <span>gardening!</span></div>
```

1
point

15.

Semantic HTML tags

☐

May help the SEO ranking of the page

☐

Help computers better understand the structure of the page

☐

Are required to be used in HTML5

☐

Help humans better understand the structure of the page

1
point

16.

One purpose of HTML Character Entity References is

☐

To allow the browser to display certain characters it would otherwise interpret as part of HTML code and not something to display to the user

☐

HTML Character Entity References were useful before HTML5 was introduced. After HTML5, they are no longer needed

☐

Identify character sets that the browser can support

1
point

17.

Using only HTML, how would you make sure that 3 words in an HTML document **ALWAYS** appear together on 1 line, even if the text word-wraps because the browser window is too narrow for that text line?

- ☐ Place entity reference after the 1st word and after the 2nd word (with no spaces in between words and entity references)
 - ☐ Impossible to accomplish with HTML alone!
 - ☐ Place entity reference before the 1st word and after the 3rd word
 - ☐ Place &nowrap; entity reference before the 1st word and after the 3rd word
-

1
point

18.

How can you force the browser to open a link in a new window or tab?

- ☐ Include target="new" attribute as part of the <a> tag
 - ☐ Instruct the user to right-click on the link and choose "Open in a New Tab"
 - ☐ Send some special meta tags as part of the page
 - ☐ Include target='_blank' attribute as part of the <a> tag
-

1
point

19.

The following code rendering in the middle section of the page allows someone to directly link to that middle section of the page, not just the beginning of the page:

```
<div id="superInterestingContentHere">Bla Bla</div>
```

- ☒ False
- ☐ True
-

1
point

20.

Even though the width and height attributes of the 'img' tag are not required, it's always a good idea to use them

- ☒ False
- ☐ True
-

1
point

21.

WHATWG does NOT version HTML. For them, it's **NOT** HTML5. It's just HTML.

- ☒ False
- ☐ True
-

1
point

22.

Quirks Mode is when the browser

- ☒ Can become unstable and crash in the middle of rendering a web page

- ☐ Assumes that the HTML in the web page is NOT following the HTML standard, i.e., not in standards mode. That will cause styles not to work correctly, etc.
- ☐ This is a made up term. No such thing
