my favorite course I've EVER taken!

2.

Identify invalid HTML code snippet (assume code above and below this code is valid)

○ `<span>I love <div>gardening</div></span>`

Correct Response

This is invalid because 'span', which is an inline element, can NOT contain a 'div', which is a block-level element.

○ `<div>I love <span>gardening!</span></div>`

○ `<a>I love <div>gardening<span>!</span></div></a>`

○ All are valid!
